Roles

What you can do depends on your account type:

Role	What you can do
Administrator	Everything: view, add, edit, delete and restore employees, change reporting lines, import and export, see salaries
Read-only	View the org chart, employee table, analytics and change history and export. Salaries are never shown

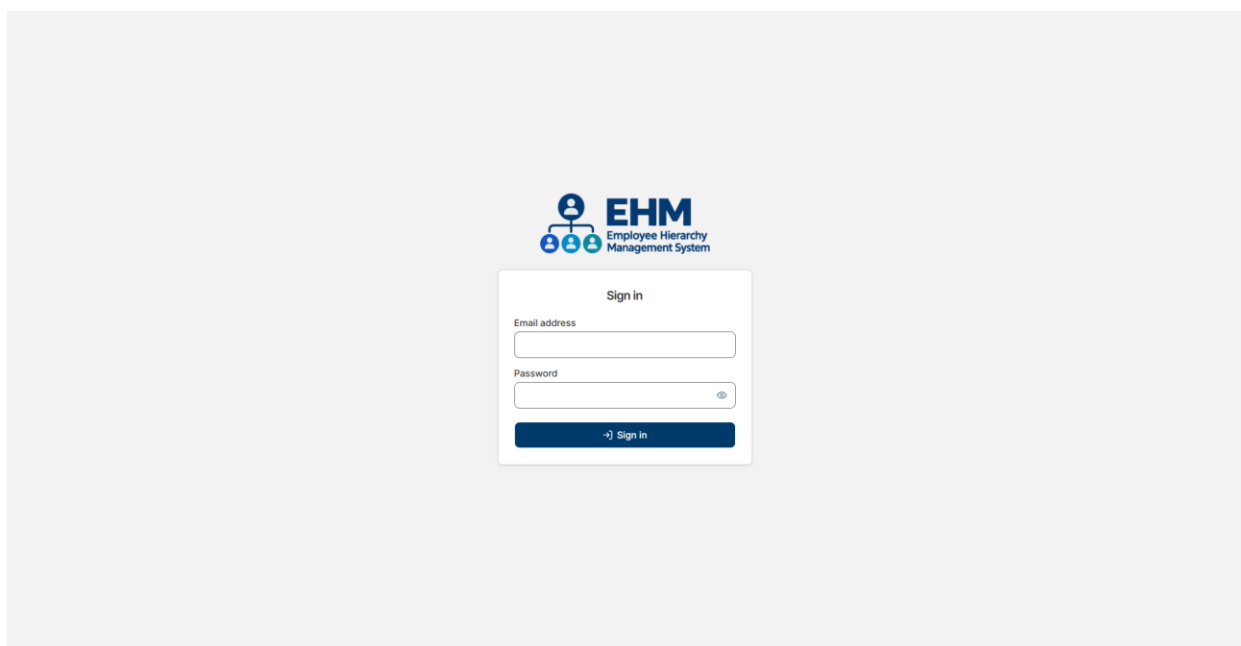

You can see which role you have on your profile page.

Getting Started

Signing in

Open <https://ehm-351897716342.europe-west3.run.app> and enter your email address and password. Two demo accounts are available:

Account	Email	Password
Administrator	admin@example.com	Demo-Admin-2026!
Read-only	viewer@example.com	Demo-Viewer-2026!

If the email or password is wrong you will see the same message either way so check both.

After several failed attempts the system will ask you to wait a minute before trying again. Once signed in you are taken to the org chart.

Signing out

Click your picture at the top right and choose **Sign out**.

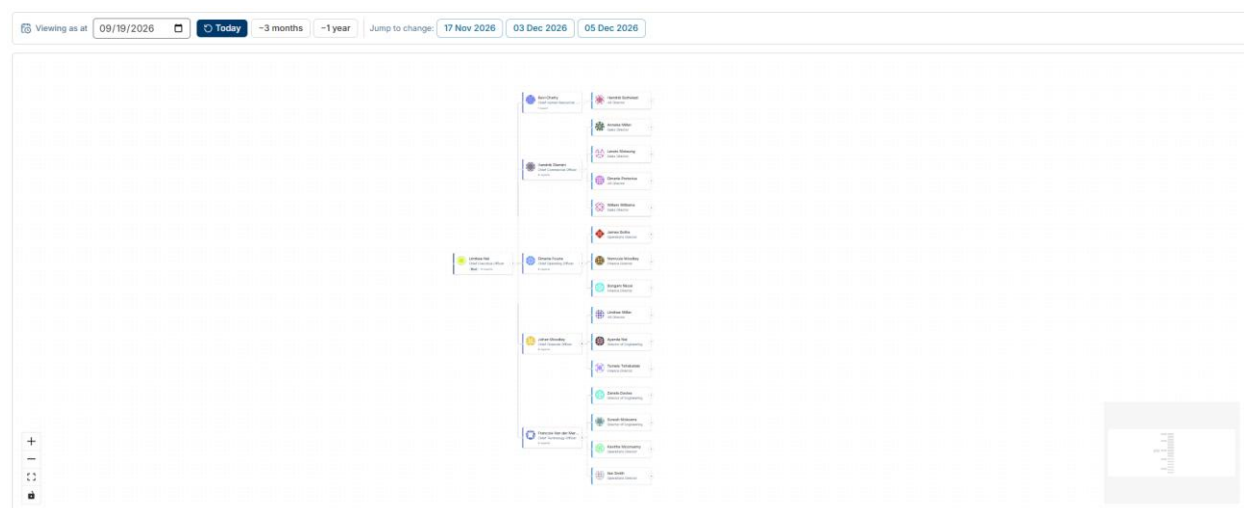

Finding your way around

The bar at the top of every page has links to the **Org chart**, **Employees**, **Analytics** and **Import** pages. It also has a search button (or press **Ctrl + K**) to jump to any person by name, employee number or job title, a clock icon for the change history and your account menu.

Org Chart

The org chart shows who reports to whom.

Moving around

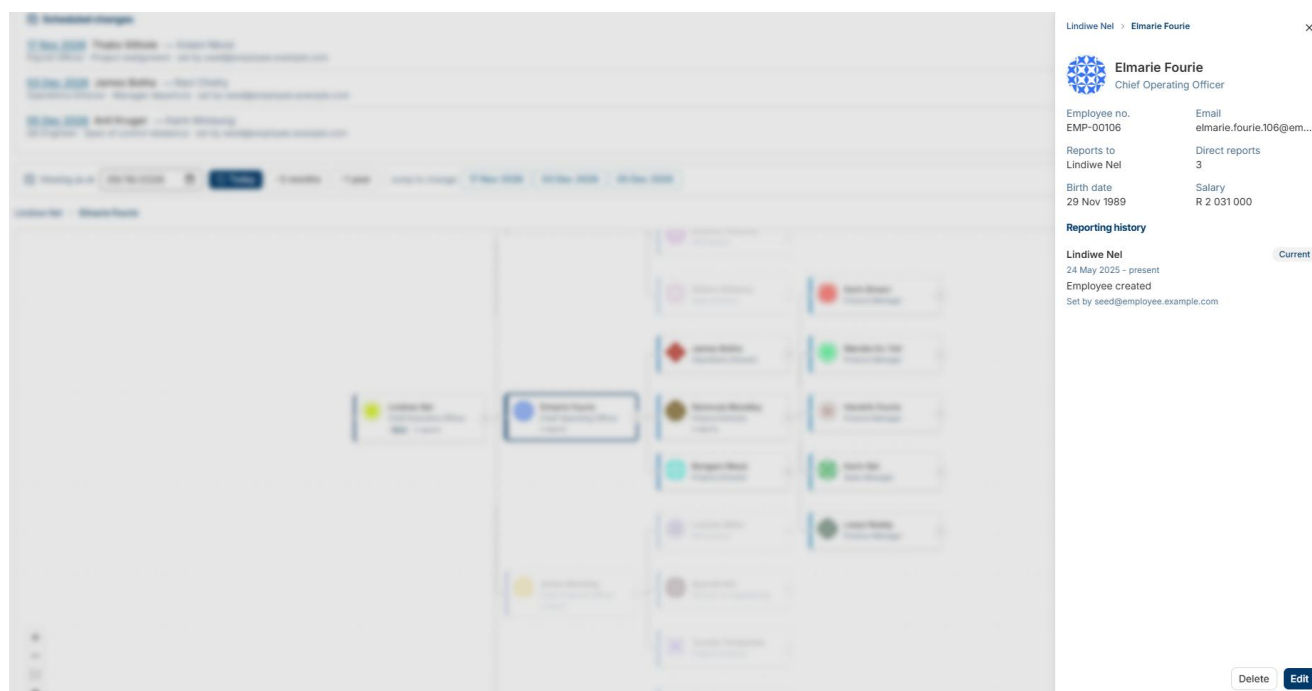

Drag the background to move the chart and scroll to zoom in or out. Click the **arrows** on a card to show or hide that person's team.

Searching the chart

Type a name in the search box on the chart. The chart moves to that person and opens any branches needed to show them.

Employee side panel

Clicking a card opens a side panel with the person's details and their reporting line up to the top of the organisation. Administrators also see buttons to edit, reassign or delete the person.

Saving a picture of the chart

Press **Export PNG** to save the chart as an image. Set up the view the way you want it first, as the image shows exactly what is on screen.

Employee Table

The **Employees** page lists everyone in a table.

Sorting

Click a column heading to sort by it. Click it again to reverse the order.

Filtering

Press **Filters** to narrow the list by name, position, manager, date of birth or salary range (salary for administrators only). Active filters show as tags above the table. Click the **x** on a tag to remove it, or **Clear all** to reset.

The page address keeps your filters and sort order, so you can copy the link and send the same view to someone else.

Deleted employees

Turn on the **Deleted** toggle to see people who have been removed. They can be restored (see Restoring an employee).

Employee Details

Click a row in the table or a card in the chart to open a person's page. It shows their photo, name, job title and employee number, date of birth, email, salary (administrators only), their manager and direct reports, their reporting line, every manager they have had and every change made to their record.

The screenshot shows the 'Employee Details' page for 'Lindiwe Nel', Chief Executive Officer. The page has a dark blue header with the 'EHM' logo and navigation icons. Below the header is a white navigation bar with tabs for 'Org chart', 'Employees' (selected), 'Analytics', and 'Import'. The main content area has a white background. At the top left is a green and yellow logo. Below it is a button labeled 'Upload photo'. The employee's details are displayed in a white box with a light blue border. The details include: Employee number (EMP-00001), Date of birth (23 Sept 1974), Email (lindiwe.nel.1@example.com), and Salary (R 3 307 500). Below the details box is a section titled 'Change history' with a sub-section 'Employee created' showing a log entry: 'sued@example.com - 19 September 2026 at 09:42'.

Field	Value
Employee number	EMP-00001
Date of birth	23 Sept 1974
Email	lindiwe.nel.1@example.com
Salary	R 3 307 500

sued@example.com - 19 September 2026 at 09:42

Managing Employees

This section is for administrators only.

Adding an employee

On the **Employees** page press **Add employee** and fill in the employee number, first and last name, email, date of birth, position and salary. Choose a manager or leave it empty for someone at the top of the organisation such as the CEO. If you enter an email that has a Gravatar profile, the form offers to fill in the name and job title for you.

The screenshot shows the 'Add employee' form on the right side of the interface. The form includes the following fields:

- Employee number:** EMP-00001
- Position:** Chief Technology Officer
- First name:** Michael
- Last name:** Koch
- Email:** michael.koch0512@gmail.com
- Birth date:** 12/07/2005
- Avatar URL (optional):** (empty)
- Salary:** 200000
- Currency:** ZAR
- Manager:** Boitumelo Botha

At the bottom of the form are 'Cancel' and 'Create employee' buttons. On the left, a table lists existing employees with columns for Employee ID, Position, and Birth date.

The form checks your entries as you type. Employee numbers and emails must be unique, the date of birth must be in the past and the salary cannot be negative.

Editing an employee

Press **Edit** on the person's page or row. If someone else changed the same record while you had it open, the system stops your save and asks you to reopen the record, so nobody's changes are lost.

Deleting an employee

Press **Delete** and choose what happens to the person's direct reports:

Option	What happens
Reparent	Their reports move to the deleted person's manager
Promote to root	Their reports are left without a manager
Cascade delete	The person and everyone below them are deleted

The dialog shows how much affected employees before you confirm.

The screenshot shows the 'Employees' table in the EHM system. A modal dialog titled 'Delete Boitumelo Botha?' is open, asking the user to choose what happens to their direct reports. The dialog includes the following text: 'Choose what happens to their direct reports. This cannot be undone from here, but a deleted employee can still be restored from the Deleted filter.' The options are:

- ☒ **Repair** 4 employees affected
Direct reports move up to this employee's own manager.
- ☐ **Promote to root** 4 employees affected
Direct reports become top-level (no manager).
- ☐ **Cascade delete** 4 employees affected
This employee and their entire subtree are deleted.

The background table lists employees with columns: Employee, Employee no., Position, Birth date, Salary, and Reports. The 'Deleted' toggle is visible in the top right of the table header.

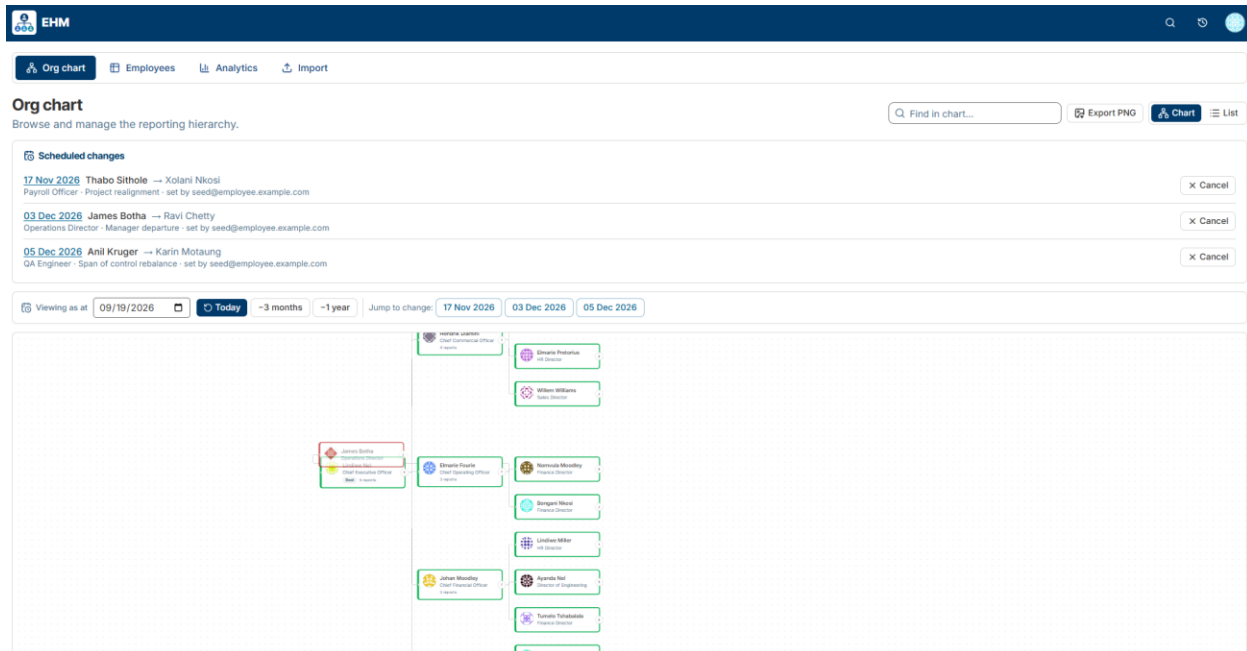

Restoring an employee

Turn on the **Deleted** toggle in the employee table, find the person and press **Restore**.

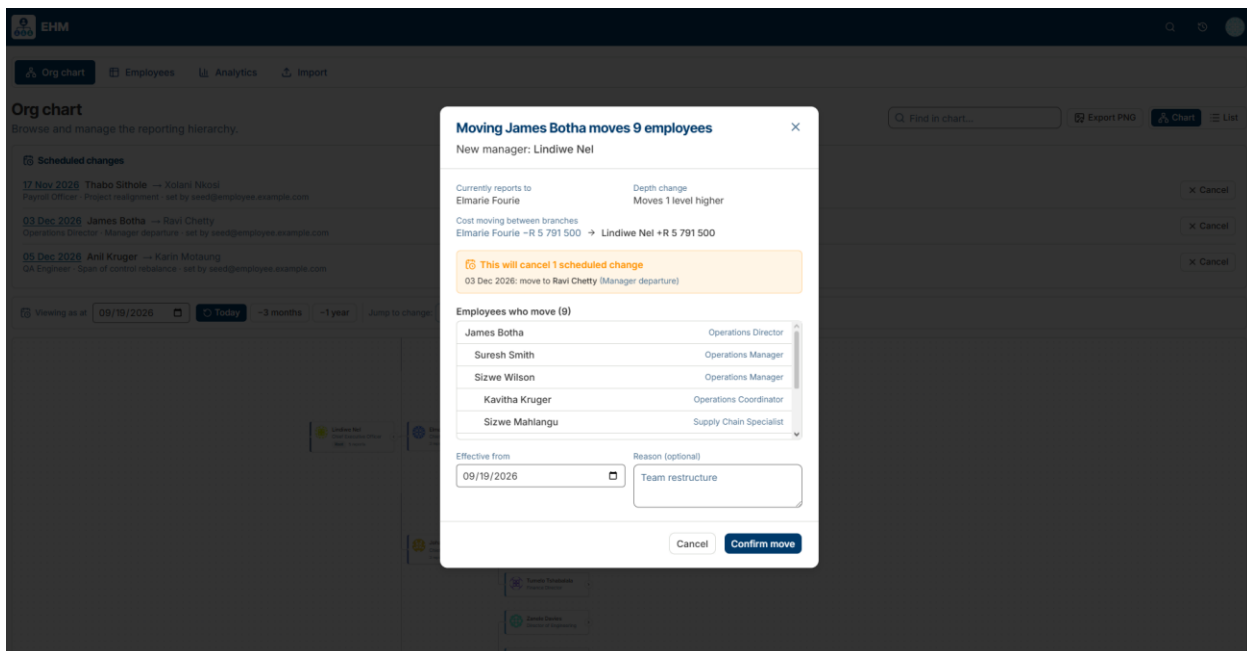

Changing Reporting Lines

This section is for administrators only. There are three ways to change who someone reports to:

- **Drag and drop** a person's card onto their new manager on the org chart.
- Press **Reassign** in the chart's side panel and search for the new manager, or select a card and press **M**.
- **Edit** the employee and change the manager field.

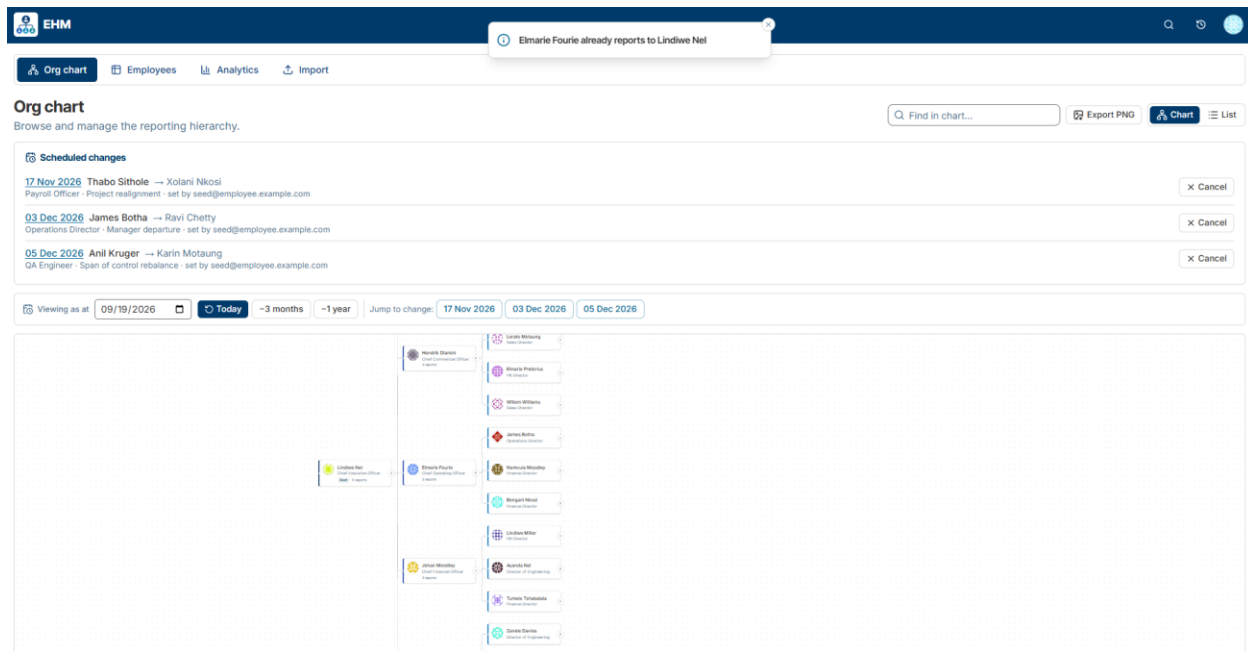

Before the change is saved, a preview shows who moves (the person and everyone below them), how many people that is and for administrators, the salary cost moving between teams. You can add a reason, which is kept in the person's history.

Nobody can be their own manager and reporting lines cannot form a loop. For example, if Thabo reports to Naledi Naledi cannot be moved under Thaboa again since they already report

to them. If you try, the system blocks the change and shows the chain that would have been created.

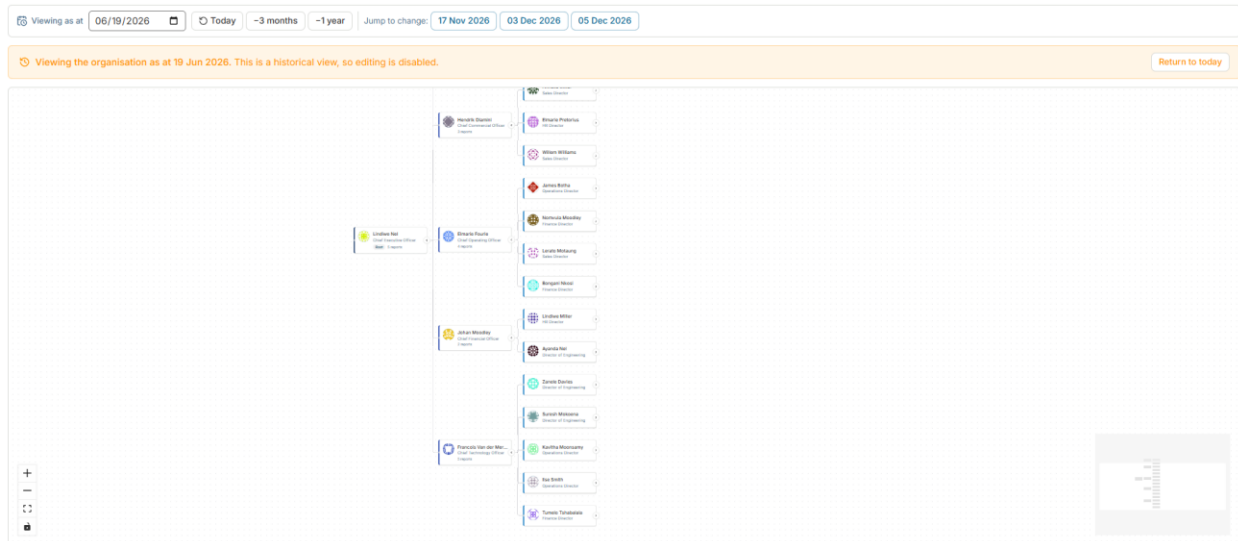

Past and Future Dates

The org chart can be viewed as it was on any past date, and changes can be scheduled for a future date.

Viewing a past or future date

Use the **Viewing as at** date box above the chart or the **Today**, **-3 months** and **-1 year** shortcuts. The chart redraws as the organisation stood on that date. A banner shows that you are not looking at today and editing is switched off until you press **Return to today**.

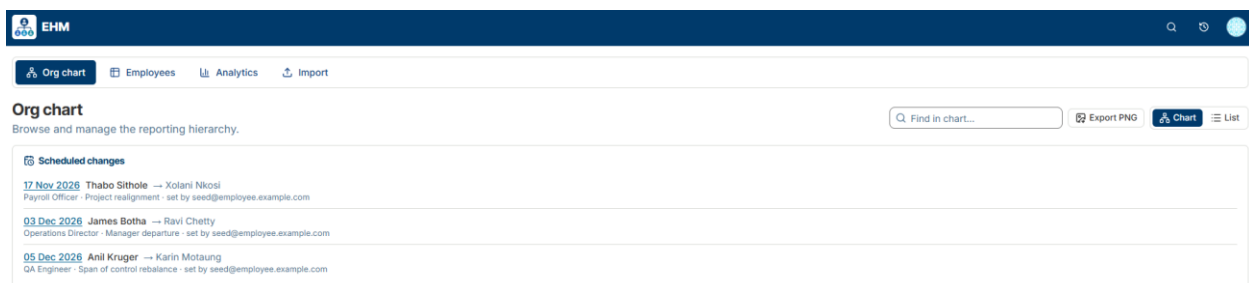

Scheduling a change

When you reassign someone, set the **Effective from** date in the preview to a future date. The button changes to **Schedule move**. The change takes effect on its own on that date.

Scheduled changes

The **Scheduled changes** panel above the chart lists every move that has not happened yet. Press the **cancel** button next to one to cancel it.

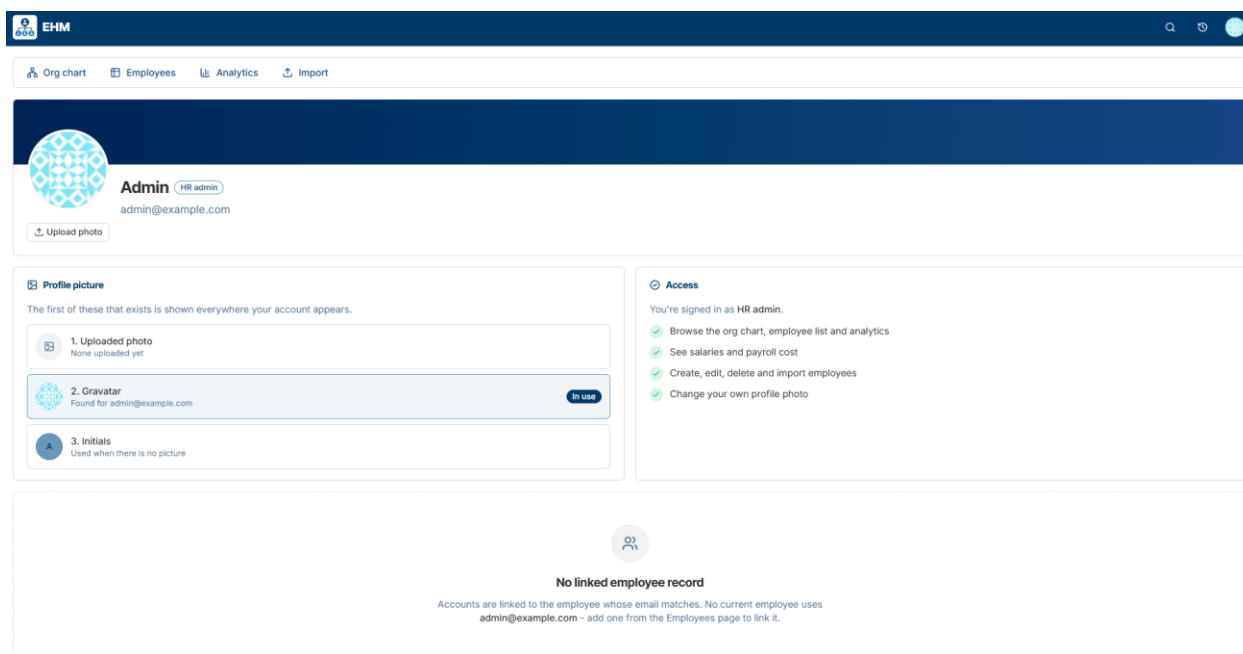

Photos and Your Profile

Each person's picture is their uploaded photo if there is one, otherwise their Gravatar (the picture linked to their email at gravatar.com), otherwise their initials.

Administrators can upload a photo for an employee by pressing **Upload photo** on the employee's page. JPEG, PNG, WebP and GIF files up to 5 MB are accepted.

Your profile

Choose **Your profile** from the account menu. It shows your picture, your role and what it allows, and your employee record if one uses the same email. You can upload or remove your own photo here.

Export and Import

Exporting

On the **Employees** page press **Export CSV** to download the list as a spreadsheet. The export only includes the rows that match your current filters. Read-only users get the file without the salary column.

Importing

This is for administrators only. On the **Import** page choose a **.csv** or **.xlsx** file. The easiest way to get the right columns is to export first and edit that file. The columns are:

Column	Required	Notes
employee_number	Yes	An existing number updates that employee; a new one creates an employee
first_name, last_name	Yes	
email	Yes	Must be unique
birth_date	Yes	Format YYYY-MM-DD
position	Yes	
salary	Yes	A number, for example 450000
currency	No	Defaults to ZAR
manager_employee_number	No	The manager's employee number. Leave empty for no manager

After you choose the file, a preview marks every row as **will create**, **will update** or **blocked**, with the reason. Nothing is saved yet. If any row is blocked, fix it in your file and try again as nothing is imported until every row is valid. When the preview is clean confirm the import.

Import
Upload a CSV, correct anything it flags in the table, and commit once every row passes. Nothing is written until you do.

employees-valid.csv 5 row(s) 5 to create 0 to update Every row passes

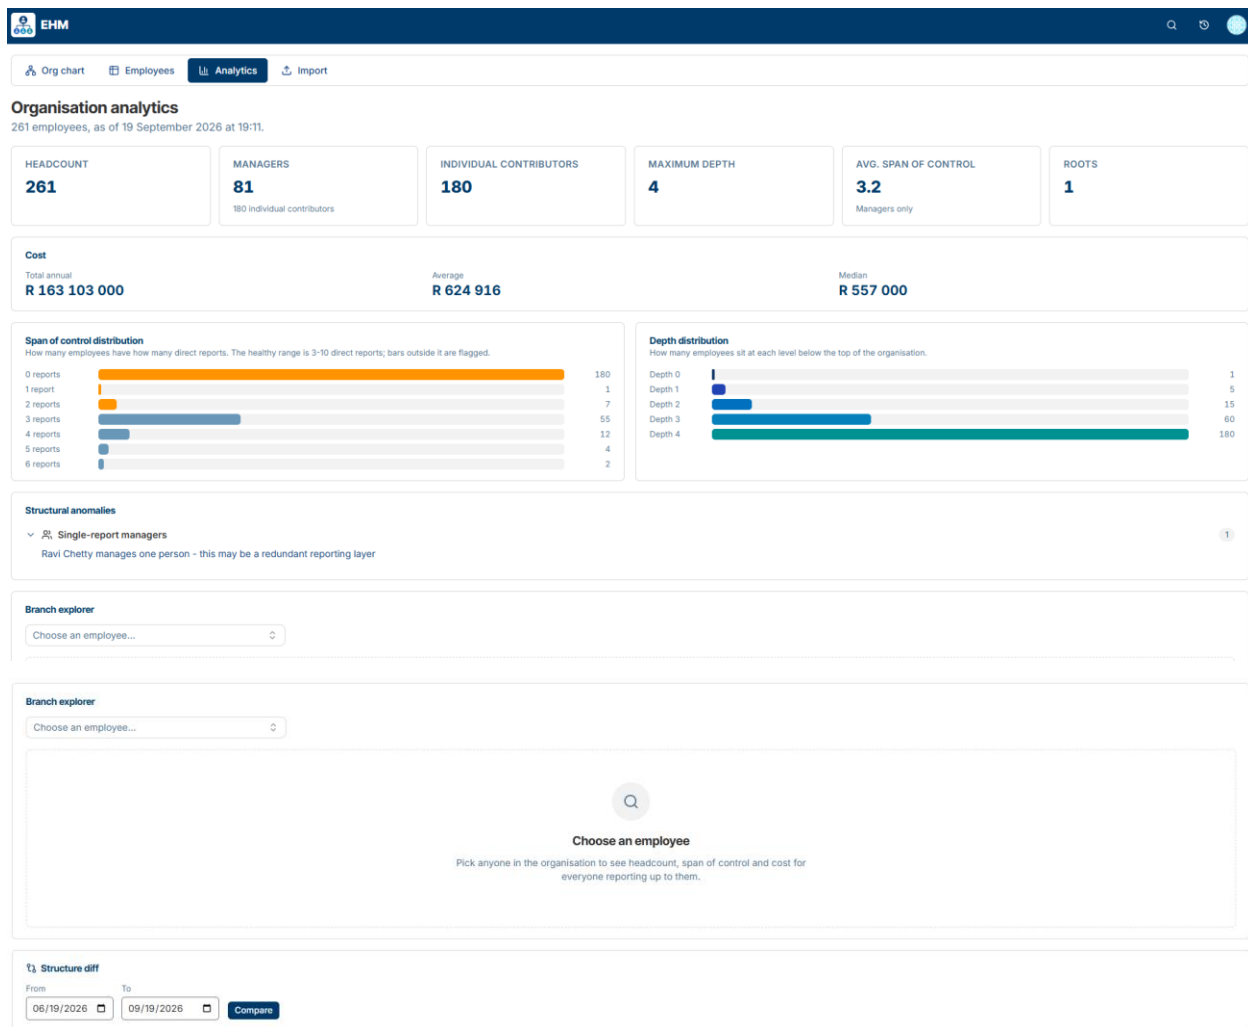

Download edits Check again Discard Submit

Showing 1-5 of 5 Rows per page 50 1

Row	Employee no.	First name	Last name	Email	Birth date	Position	Salary	Currency	Manager no. optional

5	EMP-09004	Johan	Van der Merwe	johan.vandermerwe@iir	1988-01-30	Data Engineer	655000.00	ZAR	EMP-09005
6	EMP-09005	Ayanda	Khumalo	ayanda.khumalo@impor	1982-06-17	Data Engineering Manag	905000.00	ZAR	EMP-00002

Analytics

The **Analytics** page shows the shape of the organisation: headcount, managers and team sizes, how many levels deep it goes and for administrators, payroll totals. It also flags things worth a look, such as managers with very large teams or with only one report.

Branch explorer shows the same figures for one team: pick a person to see the totals for everyone below them.

Compare two dates shows what changed in the structure between two dates you choose, such as who changed manager.
